The post-card should bear the headmaster's address only, and no other writing. Such post-cards will be returned to them in due course with the 'Received' stamp of the office impressed upon them. Headmasters who do not receive the post-cards within fourteen days of the despatch of the nominal rolls should address the undersigned.

SUGARCANE CROP OF 1929—INTERMEDIATE MONTHLY REPORT

The condition of the crop is fairly good in all the districts and normal yields are expected except in parts of Chittoor and Salem districts, if there are no unseasonal rains at the time of harvest.

Madras, 10th December 1929.

COTTON CROP OF 1929-30—THIRD FORECAST REPORT.

[On an average of the five years ending 1927-28, the area under cotton in the Madras Presidency has represented 9·6 per cent. of the total area under cotton in India.]

The area sown with cotton up to the end of November 1929 is estimated at 2,014,000 acres as against 1,975,000 acres on the corresponding date of last year. There has been an increase of about 2 per cent.

There has been an increase in area in Coimbatore, Madura, and Salem owing to good rains in September. The reduction in area in Tinnevelly is due to the fact that sowings are late in parts and may be made up by the time of the next forecast report. The reduction in the area under *mungari* or early cotton in Bellary was due to the lateness of the season. Inadequate sowing rains in August are responsible for the fall in area in Nellore.

The area under irrigated cotton, mainly cambodia, is estimated at 171,900 acres against 150,800 last year, an increase of about 14 per cent.

2. The condition of the crop is good in the Deccan and fair in the other districts. The seasonal factor for the Presidency works out to 95 per cent of the average against 100 per cent on the corresponding date of last year. On the basis, the total yield is estimated at 418,500 bales of 400 lb. lint against 405,500 bales last year. This represents an increase of three per cent. The crop in the South is, however, young and it is too early to estimate its yield with any degree of accuracy.

3. The estimated area and yield under the several varieties are given below :—

PADDY CROP OF 1929-30—SECOND FORECAST REPORT.

[On an average of the five years ending 1927-28, the area under paddy in the Madras Presidency has represented 13·1 per cent of the total area under paddy in India.]

The area sown with paddy up to the end of November 1929 is estimated at 8,904,000 acres against 9,878,000 acres on the corresponding date of last year, i.e., an increase of 26,000 acres.

2. The increase in the South is due to the receipt of early freshes. In the Circars (Kistna excepted), there has been a decrease in area owing to the receipt of late and insufficient rains. The partial failure of the South-West monsoon is responsible for the fall in area in Nellore, Chingleput, Chittoor and North Arcot.

3. The first crop has been harvested everywhere.

Yields, normal or slightly above normal have been reported from West Godavari, the Deccan, Trichinopoly, Tanjore, Ramnad and the West Coast. Yields, below normal have been reported from the other districts.

The seasonal factor for the Presidency works out to 97 per cent of the average against 101 per cent on the corresponding date of the previous year.

THE INDIGO CROP OF 1928-29—SECOND REPORT

(On an average of the five years ending 1927-28, the area under indigo in the Madras Presidency has represented 49·2 per cent of the total area under indigo in India.)

The area sown with Indigo in the Madras Presidency up to the end of November 1928 is estimated at 46,000 acres against 30,200 acres at the corresponding date of last year, i.e., an increase of 52 per cent.

2. The increase occurs mainly in the Carnatic and Central districts and is due to the popularity of the crop as green manure. The area in the Deccan fell by 3,000 acres for want of timely sowing rains in July and August.

3. Yields below normal are reported from the Carnatic and the Central districts. It is expected to be normal in the other districts.

4. There is no information about the quantity actually manufactured into dye or ploughed into wet lands as manure, though the crop is mostly used as green manure, especially in the Carnatic and Central districts. If the entire crop be converted into dye, the yield would work out to 11,490 cwt. against 8,919 cwt. estimated at the corresponding date of last year.

TENDER FOR THE SUPPLY OF ARTICLES OF DIET AND OTHER HOSPITAL REQUIREMENTS FOR THE GOVERNMENT GENERAL HOSPITAL, MADRAS, FOR THE YEAR 1930-31.

NOTICE is hereby given that sealed tenders in duplicate will be received up to 11 o'clock (morning) on Monday the 6th day of January 1930 by the Superintendent, Government General Hospital, Madras, for the supply of the following articles from 1st April 1930 to 31st March 1931.

(i) *Diet, storable and non-diet, storable.*—Consist of articles which must be supplied in such quantities as required by the Superintendent from time to time.

(ii) *Diet, perishable.*—Consists of perishable article of daily supply. An indent for each day's requirements will be given to the contractor.

(iii) *Non diet, perishable, wines and spirits, aerated waters and bedding and clothing.*—Consist of articles to be indented for in quantities as required.

2. Tenders will be opened by the Superintendent of the Hospital at 12 a.m. on Monday the 6th January 1930 in the presence of those interested who may choose to attend.

3. The articles required are detailed in the classified schedules annexed, and information as to samples, etc., may be had on personal application at the hospital.

4. The number or quantity entered in the schedule is the minimum number or quantity which the Superintendent requires to be supplied; but the contractor will be under an obligation to supply such larger number or increased quantity as the Superintendent may require him to supply.

5. Printed forms of tender can be had on application at the hospital.

6. Rates should be quoted separately for each article. No tender for the supply of articles marked 'at current market rates' will be accepted.

7. Tenders should be superscribed in the manner classified in paragraph (1) and on the cover the words 'Tenders for the hospital supplies" written. Each tender must contain not only the rates but also the total value of each item of supply entered in separate column, the items in which must be totalled up showing the aggregate value of each entire tender. The rates quoted in tenders should also be expressed in words in a separate column provided for the purpose.

8. Every correction in the tender should invariably be initialled by the tenderer, failing which the tender will be rejected.

9. The tenderer should attach a certificate to his schedule or schedules to the following effect :—

"*I, the tenderer, agree to have the earnest money, if in Government promissory notes or bank receipts confiscated to Government in case of my failure to undertake the contract.*"

10. Each tender must be accompanied by a deposit equal to 5 per cent of the total aggregate value of the articles tendered for as earnest money (in Government promissory notes or bank receipts). When several articles are tendered for, one bank receipt for the total amount of earnest money will be received. In default of such deposits the tender will be rejected, nor will any tender be received after the time fixed for the receipt of tenders. *No cash will be received.* This deposit will be returned to unsuccessful tenderers immediately and to the others as soon as they have lodged the security mentioned in paragraph 18 *infra*.

The deposit in bank should be made in the name of the Superintendent of the hospital.

11. Sealed samples of about one pound in each of bread, rice, dhall and coffee should be submitted along with the tenders. Samples for other articles are not required unless called for. When called for, they must be sent in within two days. All tender samples shall be subject to analysis by the Public Analyst, King Institute, Guindy, if the Superintendent or the Surgeon-General so desires. If approved and tender accepted the samples received will be counted as part of the supply. If rejected the samples will be returned to the tenderers. Tenderers are distinctly to understand that, if the tender be accepted, the balance of the article or articles required must be in every way equal to the approved sample. The opinion of the Superintendent to be final on this point.

12. The bread supplied to hospitals from time to time will be subject to analysis and the contractor will be liable to a penalty for exceeding the percentages laid down in paragraph 13 below. This penalty will be subject to the maximum of 10 per cent of the security amount deposited by the contractor.

13. The bread supplied to hospitals shall be free from alum and yield an acidity equivalent to not more than 3 c c normal acid per 100 grammes of bread. The maximum limit of ash permissible in the case of bread is 0·2 per cent (calculated on the dry solids) insoluble in dilute hydrochloric acid.

14. Dhall supplied to the hospital should be of a uniform light yellow colour, consisting mainly of unbroken half grains and should be dry and free from stones, dirt or any extraneous matter and be capable of being cooked completely within half to three-fourth hour

15. No person making a tender shall be allowed to withdraw his tender for the space of ninety days from the date thereof and in the event of his so doing, his deposit shall be forfeited to Government.

16. The Superintendent reserves to himself the right to decline or accept the tender for any one or more of the articles tendered for without assigning any reason for so doing.

17. Contracts are liable to partial or entire cancellation by the Government within three months from the date of acceptance of the tenders by the Superintendent of the hospital or by the Surgeon-General, supplies made before that date not being affected.

18. The successful tenderer must, within three days from date of receiving intimation that his tender has been accepted, lodge security, viz., 10 per cent on the total value of the articles, failing which his deposit will be forfeited to Government. The contractor's security if not confiscated will be returned to him immediately on completion of his contract. When Government securities, municipal debentures or port trust bonds are tendered as security by contractors, they will be accepted at their face value or at market price, whichever is less.

19. Government promissory notes lodged as earnest money or security deposit for a period of twelve months or less *shall not be endorsed over to the Superintendent, but shall remain in the name of the depositor.* Government will appropriate or cancel the notes as per G.O. No. 2358, dated 31st March 1880, Military, authority to that effect being duly entered in the contract or other documents executed by the depositor.

20. The successful competitor will be required to pay the value of the proper stamp duty on the contract and execute the necessary agreement.

21. The contract may not be sublet.

22. No article shall be supplied to the hospital, except on authority signed by the Superintendent or by some responsible person authorized by him in writing to do so.

23. No advance of cash will be made to the contractor.

24. Payment will be made on monthly bills. Fractions of a rupee in the totals of contractors' bills shall be rounded off to the nearest rupee (i.e. fractions of less than half a rupee are disregarded and half a rupee and over are taken as a rupee). The totals of bills for less than Rs. 25 shall be rounded off to the nearest anna (i.e., amounts below six pies are disregarded and six pies and above are taken as an anna).

25. A fine not exceeding 10 per cent of deposit money, will be levied for any infringement of the stipulations of the bond on each occasion, and, if frequently repeated the contract will be annulled and the security confiscated to Government.

Note.—Each tender must be accompanied by a deposit equal to 5 per cent of the total aggregate value of the articles tendered for as earnest money (total value = rate × probable quantity of the article). Deposit should be either bank receipts or Government promissory notes—vide paragraph 7.

The Chief Accountant points out that the enhanced values in excess of their actual cost, adopted for the purpose of insurance since the year 1918 in the case of certain buildings, have now been reduced in the schedule submitted by him so as to represent their actual cost of construction—the conditions which led to the adoption of the enhanced values having now ceased to exist.
